## **Sixteenth Addenda to Criticism of the Current Science in the World**

**Pejman Malekinejad**

*Department of Materials Science and Engineering, Kerman Graduate  
University of Technology, Iran*

### **Abstract:**

*In this article, some facts about schizophrenia and other mental disorders were discussed. Furthermore, some scientific problems of Iran were mentioned. It was concluded that Iran and I will not become anything in the science, I have no intelligence and Iran and I will not become anything in general. Also one petition was introduced in this paper. In addition, it was deduced that the only way for the scientific advancement of Iran is to make Iran a state of USA.*

***Keywords: Petition, Crazy, DEPRESSIVE REALISM, Science, Mathematics.***

---

**Introduction:** Voice of America (VOA Persian) has issued an article [1] that is in the same line with this paper. In fact, that article from VOA Persian confirms this paper. Also Eminent Crown Prince of Iran, Reza Pahlavi has a saying from Atamalek Joveini about Iran Islamic Regime as “They came and dug and burned and killed and took away and went” [2] which approves this paper.

**Discussion:** After finishing my high school, I got prepared for the university entrance exam in Iran. For 2 years I had a mathematics teacher named Professor Parviz Hasanpour. At that time, he was retired for 10 years. But he was a scientifically prominent person in my city of Birjand. His highest degree was BSc but he also taught at university as a university professor. During the 2 years, he repeated one scientific fact in the class for many times and for all the students as “To solve scientific problems of math, you do not need to learn and memorize new and complicated formulas. All the math problems can be solved by the use of simple rules which are taught up to the level of high school”. I got this point from him and I worked very much on it. As a result, my math had great advances. In the university entrance exam, I scored 78% for math. In the university, I could simply solve complicated math problems by this theory from Professor Parviz Hasanpour and my math grades were highest in the class. People thought I had superhuman and supernatural ability in solving mathematics problems. Many courses in the university field of me (Safety and Technical

Inspection Engineering) were based on mathematics like physics, thermodynamics, fluid mechanics, mass transfer operations, physical chemistry, heat transfer and etc. In addition, some courses in university were pure mathematics like general mathematics, differential equations and engineering mathematics. Also mathematics is a very difficult course in all fields. The basic sciences are defined as the scientific disciplines of mathematics, physics, chemistry, and biology. They are called basic sciences because they provide a fundamental understanding of natural phenomena and the processes by which natural resources are transformed. So I was expecting a glorious scientific future for myself. Therefore, the people tried to make mental disorder for me in the same way as in the HOLLYWOOD movies of “The Silence of the Lambs, 1991”, “Rain Man, 1988”, “A Beautiful Mind, 2001”, “The Iron Lady, 2011” and etc. But it was expository and exhibitivite only to make people weak. After BSc degree, I went to work for some years and then I continued education to MSc degree. Then I found that a large part of discovered science is kept secret and is not in public access. In fact, by the use of this theory from Professor Parviz Hasanpour, I could not solve the scientific problems some of which were mentioned in my recent articles [3 to 18]. This was because it was not sufficient scientifically since a large part of discovered science is kept secret. From this theory of Professor Parviz Hasanpour it can be concluded that universities have nothing new to learn and they are waste of time and have no scientific value. Therefore, you can see that this theory from Professor Parviz Hasanpour and that theory from my university professor Dr. Mohammad Jamialahmadi which says that a large part of discovered science is kept secret are in the same line and approve and strengthen each other. Also my father said that universities in Iran are waste of time to make people busy with science for them not to think of important things like politics. According to these 2 theories, I will not continue education since I will not become anything in the science and I will not become anything in general as I have previously said [3 to 18]. Also accordingly, my studying will be mainly and not only limited to the following files to find a job as a simple employee whose final limit of assets will be having a house and a car. Also I will continue my political activity.

- AWS Welding Handbooks (Volumes 1 to 5)
- ASNT NDT Handbooks (Volumes 1 to 10)
- Course Manuals of NACE CP 1, NACE CP 2, NACE CP 3 and NACE CP 4
- Student Manuals of NACE CIP Level 1 and NACE CIP Level 2
- ASM Metals Handbooks
- Standards and other publications from AWS, ASME, API, NACE, AWWA, NFPA, ASTM, TEMA, SSPC (SPC), ABS, AAR, AASHTO, AISC, AREA, NBBPVI, UBPVLS, FED, PFI, SAE, UL, MSS SP, ASNT, ...

Anyway there is a building in the University of Birjand which is named in the memory of Professor Parviz Hasanpour as “The Educational Building of Professor Parviz Hasanpour” [19]. He was the most expensive and most valuable private mathematics teacher for preparation for Iran university entrance exam in my city of Birjand.

The principles of DEPRESSIVE REALISM, psychology and mental disorders like schizophrenia are expository and exhibitive only to weaken the people. When I see that some people succeed without any try and I do not succeed anywhere, then it can be concluded that it is expository and exhibitive only to weaken people. So do not worry about “DEPRESSIVE REALISM” and act according to this great quote from prominent man of Mr. John Wooden as “Do the best you can ...”. I strongly believe on this quote. I will continue writing my recent articles titled “Criticism of the Current Science in the World” and “its Addenda” forever. Also I will continue my political activity forever. I wish everybody to be extremely successful and even far more than me for all the of the world to be beneficial of him/her. Due to the application of DEPRESSIVE REALISM principles, my life was and is miserable and this is against HUMANITY. By the way do not forget that it is all expository and exhibitive only for the people not to work on anything like science and to weaken them because otherwise they will have a future like me and they will catch schizophrenia like me. The animation of “DROOPY, 1943” is also expository and exhibitive only to make people weak. My schizophrenia is only expository and exhibitive to make people weak. But in reality all the world attract and employ intelligent persons. Usually people apply the principles of DEPRESSIVE REALISM such that they bypass the law of MERITOCRACY but if someone work on them, then they will be trapped like a rat by the law whereas they have worked very much on this principle not to be trapped by law. MERITOCRACY is applied as a law everywhere in the world like USA, UK and so on as mentioned in the valid and official references [20, 21 and 22]. Also in USA, The Judicial Branch of the United States Government [23] and The United States Department of Justice [24] are responsible for MERITOCRACY in USA, The United States Merit Systems Protection Board officially protects federal merit systems [25] and etc. I will certainly make official and legal complains to the above constitutions for my rights being wasted due to DEPRESSIVE REALISM which is against the principles of MERITOCRACY. Nowadays it is very easy and time saving to make a legal and official complain via online websites of the above constitutions. Also MERITOCRACY is emphasized by Iran Leader on his official website which must be applied everywhere in Iran [26]. Furthermore, constitutions like “JUDICIAL POWER [27]”, “MINISTRY OF JUSTICE [28]”, “GENERAL INSPECTION ORGANIZATION [29]”, “ADMINISTRATIVE COURT OF JUSTICE [30]” and so on are responsible for MERITOCRACY in Iran. What’s more, there are INSPECTION AND COMPLAINS ANSWERING DEPARTMENT in Iran Ministry of Petroleum [31], National Iranian Oil Company [32], National Iranian Gas Company [33], National Iranian Petrochemical Company [34], National Iranian Oil Refining and Distribution Company [35], The Iran Ministry of Science, Research and Technology [36] and so on which are responsible for MERITOCRACY. I will certainly make official and legal complains to the above constitutions for my rights being wasted due to DEPRESSIVE REALISM which is against the principles of MERITOCRACY. Nowadays it is very easy and time saving to make a legal and official complain via online websites of the above constitutions. One excuse for people in Iran for not accepting my papers, not accepting my friendship, not communicating with me or not giving me a job and so on is that my articles are political and

are against Iran regime. But in response to them I can say that these are within Iran Citizen Rights which are accepted by the Office of the President of Iran in its official website [37 and 38]. According to the FREEDOM RIGHTS at this website, I am free to publish my papers of this type. As referenced in the above website, these FREEDOM RIGHTS are according to the Constitution of the Islamic Republic of Iran. Therefore, you see that those people who want to apply the principles of DEPRESSIVE REALISM on me such that they bypass the law of MERITOCRACY, were trapped like rats by the law of Iran. I accept Islamic Republic of Iran regime, its leader and its president since the majority of Iranians accept them and this is according to principles of DEMOCRACY which means the rule of the majority. Those who want to weaken the people in fact want the people dead since the end of weakness is death. Iran music is full of songs who represent the subject of DEPRESSIVE REALISM like the song of “Khosh Beh Hale Divooneh” from Mrs. Soosan [39]. But they are all expository and exhibitivite only to weaken the people. It should be noted that Iran has also some advancements but it is negligible compared to advancements in superpowers. Iranians also attract and employ intelligent people. Expository and exhibitivite concepts like DEPRESSIVE REALISM, psychology and mental disorders like schizophrenia in any society shows that it has some advancements and the people of the society do not want this advancement to be shown to everybody to be copied. Because if these concepts are copied in a society, then its people will all become crazy. My schizophrenia shows that Iran and foreign countries have also some advancements. The shadow of DEPRESSIVE REALISM can be seen in all branches of arts like cinema, music and so on in all countries. But it is expository and exhibitivite only to weaken the people. When someone masturbates, then he/she saves time for study and work in comparison to marriage in which he/she wastes time on growing children and as a result the one who masturbates advances. Furthermore, masturbation is medically safe and there is no danger of sexually transmitted diseases like AIDS and also there is no risk of getting pregnant. There are lots of free porn websites available in Google suitable for masturbation some of which are mentioned in my list of free joys [40]. One other benefit of masturbation with porn movies is that there is diversity and variety in sex compared to sex with one wife which is repetitive. For example, there are more than 9 million different porn videos available only on one porn website [41]. I have the experience of having sex with girls once I was in China but I prefer masturbation with porn movies to it because of the above reasons. My schizophrenia is expository and exhibitivite only to show to the people that do not become a mastermind or you will get schizophrenia and become wretched. In this way the people become weak. But in realty all the people attract and employ masterminds. The world is based on the science and not craziness.

Previously I have issued a list of my entertainments [18]. Here I want to correct its title as the list of my joys and not my entertainments. Entertainments waste my time and prevent from study and work. But joys are feelings of great pleasure and happiness. The new list of my free joys are available in my website [40].

I am a sick and very poor man. I requested everybody to send me money. I need a monthly basic income to survive. I have created a Web Money (Web Money is an online payment settlement system) account for financial aid to receive. The purse number is Z291871883734 and is in my name. Financial aid from any source is greatly appreciated. For financial helps from Iran, my card number in TEJARAT BANK is 5859831150971751. My poverty is expository and exhibitivite only for the people not to work on anything like science and to weaken them because otherwise they will have a future like me and they will catch schizophrenia like me.

**Conclusion:** The only way that I strongly suggest for the scientific and economic advancement and development of Iran in all fields (including politics) is to make, regard and announce Iran as a state of USA (United States of America) officially and politically (and totally). I.e. Iran should make and regard itself as a state of USA (United States of America) politically (and totally). I have heard that this idea was first suggested by His Majesty Mohammad Reza Shah Pahlavi for Iran. I have created a petition in internet [42] for everybody to sign it and to make Iran a state of USA. So please sign this petition. This petition is also based on the principles of DEMOCRACY and the rule of the majority. In this case, there is a quote from U.S. Secretary of State His Excellency Mr. Antony Blinken as “America's leadership is needed around the world, and we will provide it, because the world is far more likely to solve problems and meet challenges when the United States is there” [43]. As an important conclusion from this paper and my previous papers titled “Criticism of the Current Science in the World” and “its Addenda”, I should mention that Iran will not advance by just making copy from superpowers. In fact, these copy makings weaken Iran.
